

WASTE & RECYCLING

For many years Chain+Conveyor have supplied replacement conveyor chains, slats & sprockets to this sector, giving us experience in a wide range of applications on all types of equipment.

1 Single or twin strand scraper chains in straight or cranked link format. We produce integral or special attachments & manufacture scraper flights in a wide range of materials & sizes.

2 Extended / apron link conveyor chains - used in conjunction with steel slats or rubber belts these chains can have a deep link on the attachment side or integral side plates welded to the slat to reduce product ingress.

Popular on German & Italian manufactured equipment we can supply with plain or flanged rollers in steel & stainless steel and in any pitch.

With the largest UK stock of Imperial & Metric conveyor chains, dedicated attachment manufacture & welding, we can produce replacement chains for most waste transfer systems:

- 3 Steel slat.**
- 4 Chain edged rubber belts.**
- 5 Heavy duty apron feeders**

We can also offer wear / guide blocks on all chains in plastic & steel - fitted to the outside of each strand of chain to guide & protect the chains from contact with the conveyor support structure.

We also supply a full range of sprockets & slats to suit each chain.

Please contact us to discuss your requirements.

 **CHAIN+CONVEYOR**
- it's all in the name.
